SUMMARY

Cybersecurity enthusiast with hands-on experience in penetration testing and ethical hacking. Passionate about simulating real-world attack scenarios to uncover vulnerabilities and strengthen system defences. Eager to explore opportunities where I can leverage my technical skills to push the boundaries of cybersecurity through proactive and innovative approaches.

INTERNSHIP

Penetration Testing Intern

Mar 2024 - Apr 2024

Cyber & Forensics Security Solutions

- During my Internship I executed web attacks like SQL injection and authentication bypass to find vulnerabilities, and used Nmap to exploit NFS/SSH issues while solving CTF challenges like FristiLeaks and Vulnix.

Red Team Intern

Oct 2023 - Apr 2024

Cybersapiens

- As a Red Team Intern, I completed hands-on ethical hacking exercises and conducted advanced penetration testing to identify and resolve network vulnerabilities, simulating real-world attacks to refine offensive security techniques.

PROJECTS

Dork Automation Tool

- I developed a Dork Automation Tool using 100+ curated Google, Shodan, and URLScan.io dorks to automate reconnaissance, extracting URLs and data from input domains, leveraging XNLDorker's Playwright integration and crawling features for efficient data collection and analysis.

Synchronous: (Crash Detection System)

- I led the Synchronous project, developing a real-time crash detection system with instant notifications to family, hospitals, and police, reducing emergency response time by 50% for faster medical access.

SKILLS

Languages : C, Python

Tools : Burp Suite, Nmap, Metasploit, Wireshark, Nessus, SQL map, OWASP ZAP

Concepts : Web Application Penetration Testing

LICENSES & CERTIFICATIONS

Blockchain Security

In Progress

*Karnataka Skill Development Corporation (KSDC)
& Ashtaksha Labs Private Limited*

Certified Ethical Hacker (CEH)

2024

Cybersapiens

Google Cybersecurity Professional Certificate <i>Coursera</i>	2024
Ethical Hacking <i>Nikistian Media Pvt Ltd. & Great Learning</i>	2023
The Arduino Masterclass Workshop <i>Mangalore Institute of Tech & Engineering</i>	2023

TECHNICAL ACTIVITIES

- Identified and reported critical security vulnerabilities in websites through bug bounty and vulnerability disclosure programs, enhancing overall cybersecurity.
- Successfully completed "Capture The Bug" – A Design Verification Hackathon, showcasing strong problem-solving abilities.
- Participated in the eSim circuit simulation project organized by FOSSEE, gaining practical experience in electronics.
- Earned a "Very Good" ranking in the Cloud-based Analog IC Design Hackathon, demonstrating expertise in cloud technologies.
- Secured second place in the Code Zeus - Master of Code Competition, 2021, highlighting advanced coding skills.

EDUCATION

B.E. - Electronics & Communication Engineering <i>Mangalore Institute of Technology & Engineering, Mangalore</i> 8.32 CGPA	Sep 2020 - May 2024
